

Coronavirus (COVID-19) Information and Updates

Noble Parkway Medical Clinic continues to follow the highest level of safety precautions as we monitor COVID-19 in our communities. If there are changes in scheduled appointments, your provider will notify you. In the meantime, please do not delay care for you or a loved one.

We are offering in-person care for specialty and primary care appointments at our clinic. In-person care is based on our continual assessment of COVID-19. We will monitor and revise our in-person options based on possible future changes in the spread of COVID-19 in the community to ensure the highest level of care and safety for everyone.

The following information describes the comprehensive precautions we have put in place to help ensure the safety of patients and staff members as we expand in-person care.

If you have questions about your care, please connect with us through email or call our clinic.

Coronavirus (COVID-19) Safety Precautions

Your health and well-being are our very highest priorities. At Johns Hopkins Medicine, our infection prevention specialists are global leaders in providing guidelines to help reduce the spread of COVID-19 and other infectious diseases, and we take infection prevention very seriously in our clinic and treatment rooms. In addition, we have carefully planned and taken extra precautions to help ensure that we are doing everything we can to minimize any risk to our patients and staff members.

Our medical staff works closely with doctors to ensure that the highest levels of safety are observed.

Noble Parkway

Medical Clinic.

Address: 4808 85th Avenue North, Brooklyn Park, MN 55443
Suite# 300

Office: (763) 496-1562 | (763) 400-7908
Fax: (763) 657-0581

We require universal masking and wear appropriate protective equipment.

- All staff members, patients and visitors (if permitted) must wear masks in the facilities (except children under age 2).
- All clinical staff members wear face masks and shields.

We are extremely focused on keeping our facilities clean.

- Surfaces and equipment are thoroughly cleaned and disinfected, using products that are effective against a range of organisms and viruses, including the coronavirus that causes COVID-19.
- We clean our waiting rooms frequently.
- Our exam rooms and treatment rooms are cleaned and disinfected frequently, including before and after each patient, according to the guidelines of infection prevention experts, and the CDC.
- Hand sanitizer is always available.
- Our doctors, nurses and all medical staff members sanitize or wash their hands before and after interacting with patients.

We minimize the number of people at facilities and practice physical distancing.

- Our waiting room chairs are configured to allow us to maintain 6 feet of physical distancing.
- The number of staff members in exam and treatment rooms is limited, and only those essential to your care are present. We maintain at least 6 feet between people except during medical care activities.
- All books, magazines and toys are removed from all waiting areas.
- When possible, patients may be asked to wait in their car until their appointment time, or they may be asked to go directly to their exam room upon arrival if it is available.
- All staff members, patients and visitors (if permitted) must wear masks in the facilities (except children under age 2).
- All clinical staff members wear face masks and shields.
- Measures such as e-check-in are being implemented so patients reduce unnecessary contact with surfaces and staff at check-in and check-out.
